Windows and Doors for life

WERU | BI-FOLDING SYSTEMS

WALK OUTSIDE WITH WERU BI-FOLDING SYSTEMS

A NEW ENJOYMENT OF LIFE ARRIVES

A bi-folding system from Weru opens up your house to nature. Gardens, terraces, balconies and conservatories become a perfectly natural part of your living space by means of modern design and large door openings. Generously dimensioned, folding sliding constructions allow light, air and sun to stream into the house on those pleasant sunny days. They are the ideal interface between the inside and the outside: whether as an elegant, easily accessible connection from the house into the open air or as an unobtrusive room partition.

COLOURS – ACCORDING TO YOUR TASTE

YOU HAVE THE CHOICE OF NUMEROUS COLOUR OPTIONS

Do you want to set a modern tone or would you prefer a classic expression to your lifestyle? You have the choice with ACENTO bi-folding systems because you can opt for a different colour inside from that on the outside. In addition to the wide colour choice, you have the most diverse range of anodized surface finishes.

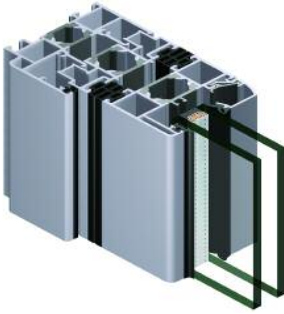

RAL classic colour swatches

FEATURES AND BENEFITS

Design

- Folding sliding system with narrow face widths from 60 mm, proportionally narrow frames to large panes
- Attractive design with rounded profile edges
- EPDM glazing gaskets with discreet gasket lips prevent black borders
- Flush-fitted glazing bead
- Outer and vent frames are mitre cut on all corners

Function

- Smooth 3-chamber profiles are robust and easy to join
- Wide choice of colours, different colours inside and outside
- Suitable for use on public and residential property
- Weather rating up to class 9A in accordance with DIN EN 12208, dependent on design
- Glazing thickness of 6-45 mm can be used
- Sound insulation up to sound insulation class 4 possible
- Folding units move smoothly and quietly
- Option of flush threshold profile, e. g. for business centres

ADAPTABLE: THE FOLDING SLIDING DOOR CREATING AN OPENING OVER THE ENTIRE WIDTH

Acento S 70 is a thermally insulated, folding sliding construction which is elegantly designed and has profiles with rounded edges. It offers a particularly high proportion of glass with a narrow face width of only 120 mm. There is the added advantage of complete compatibility with the Acento S 70 system. The symmetrical assembly of profiles allows the construction of elements for inward or outward opening to the left or to the right. A flush threshold is available as an option, ideally suited for commercial use in such areas as car showrooms, street cafes or restaurants.
